

The Spiritual Significance Of Music

BLACKMASS

MAGUS DUX ADRAMELECH

Music has the power to change many things, mainly spiritual ones. When you are "captured" by music, or even a part of music, you travel through new spheres of sensation. The soul is a simultaneous gathering of many sensations, then a riff, or a lyric, can wake up new sensations, some you can not believe you had inside. The music itself is a way of liberation, in music everything is possible, everything can be done, then the spiritual significance of music is freedom! In music, there's no right or wrong, no hard or easy. Music is a sensation just like the spiritual conception we have.
