

The Spiritual Significance Of Music

ETERNITY

A. KRIEG

We play Black Metal! Black Metal as we see and as we celebrate, should paint a picture of all "*gruesome*" humans are able to do and the mind can think about. We will blow away the chains of this reality, to extinguish the mask of the spectacle of the "*blinded ones*". Also we will show a different way, a spiritual way into another sphere of existence. Be a strong individual person! Find your own inner divine flame! Don't be a slave, be your own king and your own god. Non serviam... the significance of our music.
